EscherTool 7.00
ecv 7.00.00.00
rubric 7.00.00.01

Proved 167 of 174 verification conditions.

Proof of verification condition: Type constraint satisfied in explicit conversion from 'short int' to 'int'

In the context of class: WHPrang, declared at: C:\Escher\Customers\prang-cpp\prang.cpp (17,1)

Condition generated at: C:\Escher\Customers\prang-cpp\prang.cpp (58,22)

Condition defined at:

To prove: **minof**(**int**) $\leq$ **operator***(**heapIs** $\$heap_{funcstart_790,1}$, **this**).p1

Given:

$\$heap_{init}$.LIMIT == (**int**)80

$\$heap_{init}$.**class** WHPrang $\in$ M1 == **asType**<**short int**>((**int**)30269)

$\$heap_{init}$.**class** WHPrang $\in$ r1 == **asType**<**short int**>((**int**)171)

$\$heap_{init}$.**class** WHPrang $\in$ a1 == **asType**<**short int**>((**int**)177)

$\$heap_{init}$.**class** WHPrang $\in$ b1 == **asType**<**short int**>((**int**)2)

$\$heap_{init}$.**class** WHPrang $\in$ M2 == **asType**<**short int**>((**int**)30307)

$\$heap_{init}$.**class** WHPrang $\in$ r2 == **asType**<**short int**>((**int**)172)

$\$heap_{init}$.**class** WHPrang $\in$ a2 == **asType**<**short int**>((**int**)176)

$\$heap_{init}$.**class** WHPrang $\in$ b2 == **asType**<**short int**>((**int**)35)

$\$heap_{init}$.**class** WHPrang $\in$ M3 == **asType**<**short int**>((**int**)30323)

$\$heap_{init}$.**class** WHPrang $\in$ r3 == **asType**<**short int**>((**int**)170)

$\$heap_{init}$.**class** WHPrang $\in$ a3 == **asType**<**short int**>((**int**)178)

$\$heap_{init}$.**class** WHPrang $\in$ b3 == **asType**<**short int**>((**int**)63)

operator*(**heapIs** $\$heap_{funcstart_790,1}$, **this**).invariant1(**heapIs** $\$heap_{funcstart_790,1}$)

Proof:
